Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Part III DETAILED ACTION

Notice to Applicant(s)

1. This action is responsive to the following communications: amendment filed on **8/22/2005**.
2. This application has been reconsidered. Claims 1-27 are pending.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Nezu (U.S. 5,970,228).

With respect to claims 1, 2, 3, 10, 11, 12, 18, 19, 20, 22, 23, and 27, Nezu discloses a method for printing remotely generated interactive print jobs (column 1, lines 53-67 and figure 5) in a system including a workstation (21 or 30) provided with a processor unit (30b), a display screen (30e), and operating means (30b), a printer (52) provided with a control unit, an operator control panel, a display and a local storage device for storing print files for printing (column 13, lines 56-63), a web server (25) having means for communication with the printer; and a digital network (20) to which the workstation and the printer are connected, wherein an interactive print job is for deferred processing, in which a print file corresponding to the interactive print job is

stored in the local storage device of the printer upon reception and not printed (column 29, lines 21-25), and is, upon an operator command, presented on the display of the operator control panel of the printer for selection (column 29, lines 26-59) and, upon a second operator command then printed (column 30, lines 3-67), the method including: sending a print job to the printer and storing the print job as an interactive type in the local storage device of the printer (column 29, lines 21-30); listing one or more interactive print jobs currently stored in the local storage device of the printer on the workstation display screen (column 29, lines 47-53), and enabling an operator, through the use of the workstation operating means, to select one of the listed interactive print jobs and to give a command for printing the selected job (column 29, lines 42-59).

With regard to claims 4, 13, and 24, Nezu discloses the print jobs are handled by the user (column 20, lines 5-12).

With respect to claims 5, 6, 14, 15, 25, and 26, Nezu discloses informing the user of the status of the users' jobs (column 20, lines 44-64).

With respect to claims 7 and 8, Nezu discloses using Internet technology (column 1, lines 19-26).

With respect to claims 1 and 17, Nezu discloses printing the jobs without user interaction (column 16, lines 27-37).

With regard to claim 16, Nezu discloses plural printers (column 1, lines 19-26).

Art Unit: 2626

With respect to claim 21, Nezu discloses the server is located in the printer (column 13, lines 56-63).

Response to Arguments

5. Applicant's arguments filed 8/22/05 have been fully considered but they are not persuasive. Applicant submits that Nezu does not disclose "*enabling an operator to use the workstation operating means for selecting one of the listed interactive print jobs and for giving a command for printing the selected job*". The Examiner disagrees.

Nezu discloses enabling an operator to use the workstation operating means (21) for selecting one of the listed interactive print jobs (held print jobs) and for giving a command for printing the selected job (column 29, lines 22-54).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2626

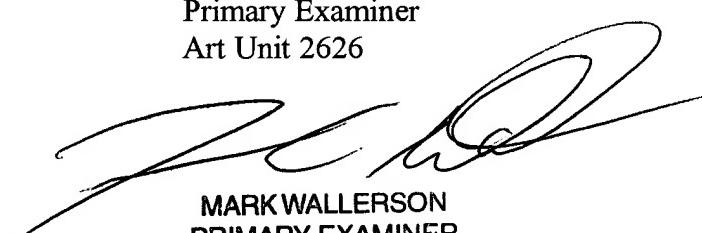

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
